

Please read these installation instructions prior to using your product, in order to use the product correctly. Keep these instructions in a safe place for future reference.

1 Replacing the front panel protective sheet

Follow the steps below to replace the sheet:

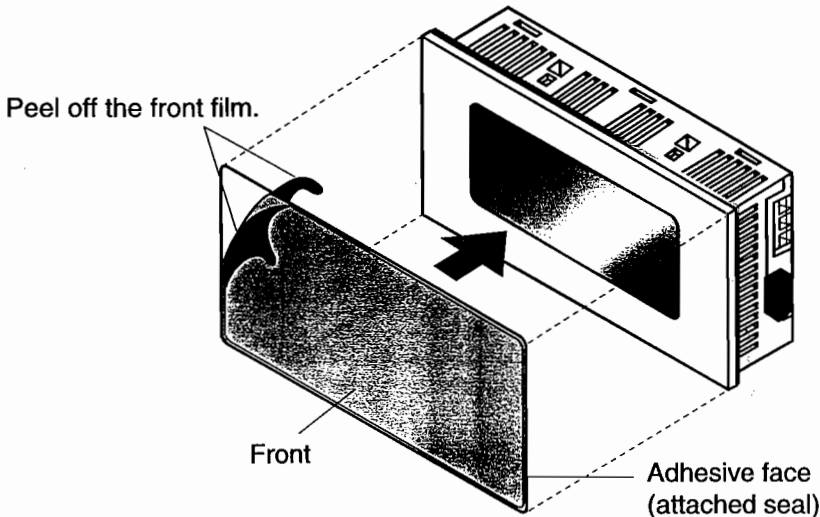

1. Remove the attached front panel protective sheet.

Peel off the attached front panel protective sheet from any edge.

2. Peel off the seal from the provided protector sheet and attach it to the unit.

Take out one of the replacement front panel protective sheets and peel off the seal with the shiny side. When attaching the sheet, align the adhesive edges with the front of the GT10.

3. Finish by peeling off the thin film attached to the top of the front panel protective sheet.

To order a manual

- Please refer to the GT10 Introductory Manual for detailed information about use of this unit. Please order using the contact information below.
