Department of Biomedical Engineering, Faculty of Medicine
M.Eng. Initial Meeting
Policy & Procedures

Objectives
- Introduce the student and project to the GPD to ensure that the scope and orientation are appropriate.
- Review the student’s current and planned course work to ensure it complies with BMED requirements.
- Discuss issues related to scope of work, funding, and the work environment to ensure that the student and supervisor have the same expectations.

Timing & Organization
- Must be held within three months of student’s first registration in the Master’s program.
- The meeting must include the student, the supervisor(s), and the GPD.
- The Graduate Program Coordinator will notify the student that the meeting is due and attempt to schedule it. It is the student’s responsibility to ensure that this occurs in a timely manner, assist with scheduling the meeting if necessary, and supply the necessary documentation. Failure to hold a meeting in a timely manner will result in an “Unsatisfactory” rating for the meeting.

Preparation
- The student should circulate, to the committee and info.bme, a one paragraph summary of the proposed project due on a date fixed by the Graduate Program Coordinator. It is expected that this will be developed in collaboration with the supervisor. Failure to circulate the one paragraph summary on time may impact the student’s status in the program. Additional details may be found here: Requirements for completing a Master’s Degree.

Outcome
- It is to be understood that this meeting is to be held at a very early stage of the programme and consequently it is expected that the student will have only a “high” level understanding of the project. Consequently, a meeting will only be rated as “Unsatisfactory” if the student fails to demonstrate a clear understanding of nature and scope of the proposed research at this level.
- An “Unsatisfactory” initial meeting must be repeated within six weeks.
